

CAPABILITY SNAPSHOT

Velora Engineering & Trading PLC — at a glance

Issued: 2 May 2026 · Ref: VEL-CAP-2026-001

Velora Engineering & Trading PLC supports industrial, commercial, and infrastructure projects through engineering-driven supply of configured and compliant equipment.

What We Supply

 Elevators Passenger, hospital, freight, and panoramic systems (EN 81 / ISO 8100 aligned).	 Generators Diesel, gas, and hybrid systems for backup and industrial applications.	 Industrial Equipment Pumps, control systems, and project-specific engineering supply.
--	---	--

Typical Applications

Commercial & Office Multi-storey offices, mixed-use developments and retail centres.	Healthcare Hospitals and clinics — bed/stretchers elevators, backup power.
Hospitality & Residential Hotels and residential towers requiring reliable vertical transport.	Industrial & Infrastructure Factories, warehouses, public infrastructure and utility projects.

Key Strengths

- 1. Configuration** — equipment configured to building type, capacity, and site conditions.
- 2. Compliance** — sourcing from manufacturers aligned with EN, ISO, and IEC standards.
- 3. Delivery** — coordinated logistics, delivery, and installation support.
- 4. Documentation** — full technical documentation including datasheets, certificates, and FAT/SAT.

Velora delivers structured, compliant, and project-ready solutions tailored to real operating conditions.
